

Day 2 Table of Contents

Note to Self-Paced Users of the Day 2 Seminar Handbook	i
Notices	1
Quick Reference	2
Seminar Outline	16
Program and Vector Data Overview	19
A Toolbox for Creating Earthwork Models	19
AGTEK Site Modeling Products Compared	20
Should AGTEK 3D Users Upgrade to AGTEK 4D?	22
Requirements for Importing Vector Data	24
Similarity of CAD, Vector PDF and LandXML Data	25
Raster PDF vs. Vector PDF	26
Tips for Working with Multiple PDF Plan Sheets	27
Revised PDF Plan Sheets	28
Image Selection Utility (Gradework 4D)	28
Alignment Strategies	29
Start-Up Options Menu	30
AGTEK Data File Maintenance	32
Requesting and Receiving Vector Data Files	33
Why Import Vector Data Files?	33
Vector-File-Ready Checklist	34
What to Ask For (CAD/Vector PDF/LandXML)	35
Improving the Odds of Getting CAD Files	36

Day 2 Table of Contents (Cont.)

Program and Vector Data Overview (Cont.)	
Sample Pre-Bid CAD File Request Letter	37
Sample Contract-Award CAD File Request Letter	38
File Types and Corresponding Procedures	39
File Viewing, Editing and Conversion Resources	41
Typical Vector Data File Manipulation Sequence	42
Modeling with Vector Data Step-by-Step	44
Sample Site Grading Plan	44
Sample Site Grading Plan Street Details	45
New Job File Setup for PDF Data	46
Import First PDF Plan Sheet	47
Multi-Page Preview Dialog	48
Adjust Display and Note PDF Data Type	49
Set Scale for First PDF Plan Sheet	50
Verify and Correct PDF Plan Scale - AGTEK 4D Method	51
Extract and Transfer First PDF Plan Sheet's Vector Data	52
Verify PDF Plan Scale - AGTEK 3D Method	53
Correct PDF Plan Scale - AGTEK 3D Method	54
Translate Job File to Designer's Coordinates	55
Match Point Selection for Aligning Next PDF Plan Sheet	56
Direct Coordinates or Selected (Common) Points?	56
Import and Align Next PDF Plan Sheet (Common Points)	57

Day 2 Table of Contents (Cont.)

Modeling with Vector Data Step-by-Step (Cont.)

Adjust Display, Note PDF Data Type, Set Scale	58
Align Next PDF Plan Sheet (to Previous Sheet)	59
AGTEK 3D (Dialog Method)	60
AGTEK 4D (Shortcut Method)	61
Extract Next PDF Plan Sheet's Vector Data	62
Unrecognized Vector PDF Plan Sheet Problem	63
Transfer Next PDF Plan Sheet's Vector Data	64
Some Points about Vector PDF Plan Data	65
Only 2D Data from Vector PDF Plans	65
Missing or Overlapping Vector PDF Line Work	65
"Horizontal Shift" Error with Next PDF Sheet	65
Correcting Next PDF Sheet's "Horizontal Shift" Error	66
Re-Loading PDF Plan Sheets in AGTEK 3D	67
Re-Loading PDF Plan Sheets in Earthwork 4D	68
Re-Loading PDF Plan Sheets in Gradework 4D	69
Manual PDF Realignment (Align Matching Edges)	70
Starting New Job File with CAD Data	72
Incompatible AutoCAD File Versions	72
External/Block References and Locked/Off/Frozen Layers	73
Widely-Separated Data	74
Arbitrary and State Plane Coordinate Data	74

Day 2 Table of Contents (Cont.)

Modeling with Vector Data Step-by-Step (Cont.)	
Crop Rectangle	74
Document SPC Translation Point(s)	75
Troubleshoot Missing CAD Data	78
Selection and Transfer of Vector Data	80
Existing and Design Data on Same Layer	80
Pre-Transfer Data Settings and Functions	81
Compression (Point Reduction)	81
Crop Rectangle	81
Imported Elevation Min/Max Filter	81
Transfer Units (Feet, Meters, Architectural)	81
Join Selected Data (AGTEK 4D)	81
Vector Data Display Options	82
Layer Display Control (Alt-B)	82
Hide/Hide All But/Show All/Gray Hidden Lines	82
Label Display Options	82
CAD Text, Elevations, Rotated Text (AGTEK 4D)	82
Vector Data Selection Options	83
Area Select	83
Layer Select/Deselect (Ctrl Key, Left Click)	83
Object Select/Deselect (Shift Key, Left Click)	83
Delete Unwanted Data	83

Day 2 Table of Contents (Cont.)

Modeling with Vector Data Step-by-Step (Cont.)

Selection and Transfer of Vector Data (Cont.)

Vector Data Transfer Options	84
To Existing or Design Surface (Right Click or Menu)	84
To Specified Surface and Layer (Send To Button)	84
Cut/Paste Function (AGTEK 4D)	84
Importing and Transferring CAD TIN Surface	85
Importing and Transferring LandXML Surface Data	86
Selecting and Transferring Step-by-Step Exercise Data	87
CAD Elevation Text Labels	87
Line Work Layers	88
Use PDF Plan Sheet to Verify CAD Data	90
Import and Align PDF Plan Sheet	90
Check CAD Line Work	92
Check CAD Elevation Text Labels	92
Find and Correct Spiked CAD Elevations	93
Job File Min/Max Elevation Report	93
Find Elevation Function	95
2D-to-3D Conversion Techniques	96
Existing Surface Data Lines	96
Contours in Edit Mode	96
F9 Elevation Snap	96

Day 2 Table of Contents (Cont.)

Modeling with Vector Data Step-by-Step (Cont.)

2D-to-3D Conversion Techniques (Cont.)

Existing Surface Data Lines (Cont.)

Bridge Gap (Join) Utility 97

F8 Auto-Increment Snap 98

Spot Elevations in Edit Mode 99

Point Compress Existing Contours 100

Conform Selected Utility 101

Spot Elevations and Break Lines in Entry Mode 102

Design Surface Data Lines 105

Landscape and Pond Contours 105

Cleanup Pond's CAD Contour 106

Building Lines 107

Bridge Gap (Join) Utility 107

F9 Elevation Snap 107

Auto Pad Utility 108

Trim and Remove Overhanging Contours 111

Top-of-Wall Landscape Grade Lines 113

Snap Circle Setting 114

Varying Landscape Spot Grades at Building 115

Level Landscape Grade Lines at Building (Offset) 116

Street Line Work 117

Day 2 Table of Contents (Cont.)

Modeling with Vector Data Step-by-Step (Cont.)	
2D-to-3D Conversion Techniques (Cont.)	
Design Surface Data Lines (Cont.)	
Edit Mode Method	117
Entry Mode Method	120
Lot Line Prep with Swap Ends, F7 Extend, F6 Insert	123
Assign Lot Line Elevation by Conform	123
Assign Lot Line Elevation by Slope	124
Assign Lot Line Elevation by Daylight	124
Checklist to Complete the Earthwork Takeoff	125
Translate Job File Data to State Plane Coordinates	126
Geo-Reference Job File with State Plane Coordinates	128
Identify State Plane Coordinate Zone	131
NGS Coordinate Conversion and Transformation Tool	131
Gradework 4D State Plane Lookup Utility	132
Reminder of Useful Functions (Edit Mode)	133
Reminder of Useful Functions (Entry Mode)	134
Additional CAD Data Manipulation Examples	135
Check and Adjust for Architectural Units	135
Adjusting Import Transfer Units (Prevention)	136
Scale Correction in AGTEK 4D (Repair)	139
Scale Correction in AGTEK 3D (Repair)	140

Day 2 Table of Contents (Cont.)

Additional CAD Data Manipulation Examples (Cont.)

Data Prep for Auto Pad Utility	141
Import Layer Selection (Alt-B) to Filter Transfer Layers	141
Create Missing CAD Line Work	143
Prep CAD ROW Lines for Pad Setback Offsets	143
Label Select, Hide All But, Join and Compress	143
Swap Ends Utility	145
Offset ROW Pad Setback Lines	145
Prep CAD Rear Lot Lines for Pad Setback Offsets	146
Label Select, Deselect, Join and Compress	146
Change Line Label of Isolated Rear Lot Lines	149
Offset Rear Pad Setback Lines	150
Prep and Offset Partial Rear Pad Setback Line	152
Cleanup Conflicting CAD Line Work	153
Label Select for Hide or Delete	154
Run Auto Pad Utility	156
Label Select Pad Elevation Text Labels	156
Auto Pad Offset Value	156
Auto Pad Data Line Errors	157
Manual Select Pad Elevation Text Labels	159
Fix Non-Responsive Pad Elevation Text Label	160
Create Artificial Pad Elevation Text Label	161

Day 2 Table of Contents (Cont.)

Additional CAD Data Manipulation Examples (Cont.)

Data Prep for Auto Pad Utility (Cont.)

Cleanup for Auto Pad Data Line Errors and Conflicts	163
Horizontal Spikes in Auto Pad Data Lines	163
Gaps in Bounding Annotation Line Work	164
Trim CAD Contours Extending Into Auto Pad Area	165

Street Model from “Conformed” Centerline

167

Join Lines before Conforming Centerline	169
CL High-, Low-, and Match-Point CAD Text Grades	170
Conform Centerline	173
Fixed Horizontal EP Offset Lines	174
Intersection Cleanup with Ctrl-X, F5, F7	175
Tapered Horizontal EP Offset Line	175
Line Snap Entry of EP Radius Lines	177
Alt-V to Hide Background Layers	177
Interpolating EP End-Point Existing Tie-In Grades	178
Final EP Line Work Cleanup	179
TBC Offset Lines	179
Shoulder Offset Lines	180
Conflicting Offset Lines and CAD Street Contours	181
Prep for Removal of CAD Street Contours	182
Trim and Delete CAD Street Contours	183

Day 2 Table of Contents (Cont.)

Additional CAD Data Manipulation Examples (Cont.)	
Street Model from “Conformed” Centerline (Cont.)	
Conform Other CAD Lines to Final Street Surface	185
Identify and Correct Interpolation Errors	185
Modeling with ASCII Text Survey Data	187
Overview and Required Data Format	187
Borrow Pit Modeling & Volumes I (No Starting Topo)	191
Borrow Pit Modeling & Volumes II (Before and After Topos)	199
Quantify and Document Bid Topo Update	213
Survey Data Layer	215
Apply Survey Utility	216
Compare GPS and Bid Topos with Contours	220
Compare GPS and Bid Topos with Cut/Fill Map	221
Compare GPS and Bid Topos with Profiles	224
Volume Calculations and Evaluation of Results	225
Cross-Section Data Modeling Problem	231
Appendix A – How to Get Help, Training, Program Updates	243
Getting Help	243
Getting Trained	245
Getting Program Updates	246
Appendix B – Keyboard Shortcuts	249
Import (CAD Transfer) Mode	249

Day 2 Table of Contents (Cont.)

Appendix B – Keyboard Shortcuts (Cont.)	
Edit Mode	251
Entry Mode	256
Profile View Mode	259
Plan View Mode	261
3D View Mode	264
Volume Report Mode	267
Haul Report Mode	268
Print Preview Mode	269
Appendix C – Download and Use Day 2 Seminar Training Files	271
Appendix D – Exporting AGTEK Data	277
Overview of Exportable File Types	277
File Preparation Tips for Field Data	279
Manage Export Colors (AGTEK 4D – Before Export)	281
Modeling Colors Display Option (Gradework 4D)	281
Manage Export Colors (AGTEK 4D – During Export)	282
Data for CAD Systems	283
3D Surface for Autodesk Revit BIM	284
3D Surface for SketchUp	286
Data for Google Earth	287
Data for Transfer between AGTEK Job Files	290
Data for Leica Grade Control	293

Day 2 Table of Contents (Cont.)

Appendix D – Exporting AGTEK Data (Cont.)	
Data for Topcon Grade Control	294
Data for Trimble Grade Control	297
Data for Stringless Curb Machines	299
Appendix E – Prepping CAD Files for AGTEK	301
Bind External References with DWG TrueView	302
Bind External References with AutoCAD LT	304
Convert DWG/DXF to Layered Vector PDF with DWG TrueView	305
Convert Architectural Units with TurboCAD Deluxe	306
Convert Architectural Units with AutoCAD LT	307
Metric to Imperial (Meters to Feet) Units Conversion Methods	308
CAD Spot Elevation Formats	309
Check for Geolocation Info (SPC Zone) with AutoCAD LT	310
Appendix F – Catalog of Day 2 Handbook Web Resources	311
Appendix G – Horizontal Translations Exercise	323
Appendix H – CAD Spot Elevation Topo Exercise	329
Appendix I – Geo-Reference Job File with Google Earth	337
Appendix J – Design and Drafting Tools	343
Example Base Map and Existing Topo Contours	344
Circle Utility	347
Point Compression Utility	348
Trim Lines Utility	349

Day 2 Table of Contents (Cont.)

Appendix J – Design and Drafting Tools (Cont.)	
Station Generator Utility	353
Copy vs. Cut for Pasting Surface Layer Data (AGTEK 4D)	354
Auto Pad Utility	357
Wildcard Label Selection	358
Assign Elevations by Daylight Function	360
Assign Elevations by +/- Edit Function	362
Assign Elevations by Slope Edit Function	363
Assign Elevations by Conform Utility	364
Fillet Line Utility	366
Establish Limit of Grading by Slope Intercept	369
Contour Surface Utility	371
Appendix K – Scaling Multiple Paper Sheets with CAD Data - AGTEK 3D	373
Appendix L – Verify CAD Data and Paper Plan Match - AGTEK 3D	375
About the Author and Seminar Instructor	377
Seminar Attendee Survey	379
Tear-Out Plan Sheet for Modeling with Vector Data Exercise	381
Tear-Out Detail Sheet for Modeling with Vector Data Exercise	382
