Earthwork Software Services' AGTEK Training Seminars COVID-19 Health Precautions in Training Classroom

Plan View of Typical Classroom Setup (Not to Scale)

Classroom COVID-19 Health Precautions

- Maximum of 13 attendees per seminar day, including the instructor.
- Each attendee is seated at their own classroom table and the tables are spaced to separate attendees by as much as possible.
- ***Unless otherwise required by government mandate, we no longer require seminar attendees to wear a mask in the seminar classroom but we do encourage at-risk attendees to consider the CDC's recommendations on how to protect yourself from COVID-19.***
- The instructor will not shake hands to greet attendees and attendees are encouraged to do the same with each other (use an "elbow bump" as an alternative).

Warning: Although the above measures can help to reduce the risk of COVID-19 transmission in the seminar classroom, these measures **DO NOT ELIMINATE** said transmission risk. We encourage all seminar attendees to protect themselves with the no-cost, highly effective COVID-19 vaccines (the vaccines don't guarantee that you won't be infected with COVID-19, but full vaccination is very effective at preventing hospitalization and death from COVID-19 complications). Any vaccinated or unvaccinated individual concerned that their (or their household members') health profile puts them at high risk of severe COVID-19 complications should consult with their healthcare provider before registering for our in-person group training seminars. By entering the seminar classroom, attendees assume and accept the risk of potential COVID-19 infection.
